

MSB Replacement Elements

With the addition of MSB replacement elements to its product line, Schroeder is now your turnkey filtration supplier for all mining applications. The MSB series provide superior last chance protection for the valves on the longwall shields.

Schroeder Industries currently manufactures over 1,800 BestFit™ performance replacement elements, consisting of cartridge, spin-on, coreless, and spun-bonded filtration elements. For more information, please visit us on the web at

www.schroederindustries.com

Applications:

- Mining

Advantages:

- **Low pressure drop** - better media construction results in lower pressure drops across element, promoting longer life
- **Proven Schroeder quality** - Schroeder has been providing contamination solutions to the mining industry for over 60 years
- **Factory & field support** - dedicated specifically to the mining industry
- **Schroeder-brand advantages** - features such as plasma welds (instead of epoxy) and design improvements such as an added hex slot in cap set Schroeder replacement elements apart from the competition

System Specifications:

Filtration Range: 25 μ - 100 μ

Element Material: End caps, support tubes, and metal mesh are all made of stainless steel

O-Ring Material: Buna N

Back-up Ring (if applicable): Nylon

Flow rate: Up to 6,000 psi (415 bar)
